3. Inspection and control – this outdoor equipment is subject to periodi
 Инспекция и контрол на съоръжението - the outdoor fitness facility is
 subject to periodic control by the organization that manages it, and if
 irregularities related to its correct use are detected, they should be
 removed.

The types of inspections are as follows:

- visual inspection /in case of frequent operation, it can also be daily, but
 at least once every 15 days/ - serves to establish dangers arising as a result
 of vandalism and atmospheric influences - missing elements, damaged
 integrity of the facility, condition of the foundation around the facility
 itself
- inspection of the stability and proper functioning of the device - every
 three months

- basic inspection, responsible for the overall condition of the device and mainly for the safety of the trainees - every year.

4. Warranty of the facility - the warranty period of the outdoor fitness equipment is two years, starting from the date of signing the handover protocol and covers the following defects:

- defects from poor-quality manufacturing of the product;
- defects from low-quality materials inserted during production.

The guarantee of the sports equipment is not valid in the case of improper operation and maintenance, as well as in the case of an established act of vandalism.
