

Wall stands for volleyball VL6

Move the slider of each stand to the maximum upper position (The upper mounting hole must remain free) Then 2.43m from the finished floor to the top of the roller is measured (corresponds to the level of the wire that stretches the top fillet of the net) and the stand is clamped to the wall with dowels and screws(not included un set), through the mounting holes. The slider allows the grid level to be lowered to 2.24m (for women)
